№ Profile

Soon to be graduate software engineer at University of Technology of Compiègne. I am currently looking for a software engineer position, starting in september 2022, in the Paris region.

Professional Experience

Sep 2019 - Aug 2022 Levallois-Perret, France

Full-Stack Software Engineering Apprentice, SAP

- studied users' and other development teams' needs in order to define the features to implement or maintain;
- implemented new features (for data treatment and the testing process), in **Java**, C++, **Javascript**, Typescript, React and SAP UI5;
- maintained already existing features: redesigned the test framework, corrected bugs;
- developed new tools allowing the replication of the infrastructure: virtualized execution environments with **Docker** for some microservices, in order to improve the data treatment;
- wrote unitary and integration tests for the developed features, with JUnit, CPPUnit, and the React Testing Library;
- actively participated to the project monitoring;
- prepared and trained colleagues to new technologies and frameworks, such as **React**, **Typescript** and Redux.

Jun 2019 - Aug 2019 Levallois-Perret, France

Full-Stack Software Engineering Intern, SAP

• designed and developed a database driver (Google BigQuery) in Java for the BusinessObjects Enterprise suite.

Jan 2018 - Feb 2018 Verberie, France

Work Placement, Poclain Hydraulics

- reorganised the Quality Control system in order to accelerate the process;
- wrote instruction sheets for the Quality Control Department.
